

# The National Safety Council's **NEW** Certificate in OSHA Compliance

*This Certificate provides you with grounding in OSHA 1910 general industry standards. You choose the compliance issues that are most important to your organization, and get in-depth reviews of the relevant standards.*

When you complete the Certificate, you'll have the ability to read and interpret specific OSHA standards so you can be confident you know how to comply, and avoid fines.

**Training designed for:** Anyone responsible for OSHA compliance—line workers, human resources, safety managers, loss control managers, safety coordinators, safety team members, and entry-level or part-time safety practitioners.

Step-by-step training keeps you on a safe track.

- Target standards most relevant to your organization.
- Review basic safety terms and concepts to help you better understand the principles of the standards.
- Understand how to read and interpret OSHA terms, concepts, and principles to ensure compliance.
- Find out what triggers an OSHA inspection and how to be confidently and completely prepared.
- Assess your current level of compliance, identify gaps, and create and implement an action plan to fill them.
- Learn practices and procedures that help you identify appropriate training and protection requirements.
- Participate in discussions that break down the standards in detail and answer your compliance questions.
- Take part in activities built around the standard, and work through ideas to implement back at your facility.
