

Coaching Drivers of Straight Trucks

Chances are you haven't considered it, but the design of these vehicles creates special difficulties. Drivers often don't realize that they have large blind spots which lead to backing collisions. The height of the driver's seat makes it difficult to spot straggling pedestrians at intersections. Frequent rear-end crashes occur because drivers don't allow for the straight truck's weight and long stopping distance.

**Friday, July 22, 2005
9:00 A.M. - 12:30 P.M.**

at the

**Chesapeake
Region Safety
Council, Inc.**
