

Silica - Competent Person Train the Trainer Course

Presented by
Michael Peelish, Esq.
From the Law Office
of Adele L. Abrams P.C.

Are You Ready for OSHA's Respirable Crystalline Silica Standard?

What is a Competent Person under the OSHA Construction Standard for Respirable Crystalline Silica? It is someone who has the knowledge to identify and the foresight to anticipate respirable crystalline silica hazards in the workplace. This is a high threshold of knowledge and understanding of the hazards associated with and the tasks that give rise to respirable crystalline silica. This "Train-the-Trainer Competent Person" course will address the universe of knowledge required to be a Competent Person. It will provide the resources for trainers to continuously deliver training to multiple persons and job sites.

October 29, 2021

Virtual Instructor Led Training

This course will address the basic content of the silica standard including:

- health hazards
- how to implement Table 1, how to handle non-Table 1 tasks
- when and how to conduct exposure monitoring
- preparation of a written exposure control plan
- what exposure and medical surveillance documentation must be maintained
- what to look for on a job site to ensure compliance with the silica rule
- how to manage the job site's multiple contractors

This Train-the-Trainer course will allow you to deliver training to other persons so they have the skills, abilities, knowledge, and confidence to ensure implementation of the written exposure control plan and to take the actions necessary and required to ensure exposure to respirable crystalline silica is minimized on a job site.
